Thin Solid Films, *196* (1991) 371–373

Contents of Vol. 196

Issue 1

Electronics and Optics

Influence of annealing on the optical properties of indium tin oxide 1
C. H. L. Weijtens and P. A. C. van Loon (Eindhoven, The Netherlands)

After-breakdown conduction through ultrathin SiO_2 films in metal/insulator/semiconductor structures. 11
J. Suñé, E. Farrés and X. Aymerich (Bellaterra, Spain)

Reactively sputtered RuO_2 thin film resistor with near zero temperature coefficient of resistance. . 29
Q. X. Jia, Z. Q. Shi, K. L. Jiao, W. A. Anderson (Amherst, NY, U.S.A.) and F. M. Collins (Niagara Falls, NY, U.S.A.)

The study of the optical properties of obliquely evaporated nickel films using IR surface plasmons 35
F. Yang, G. W. Bradberry and J. R. Sambles (Exeter, U.K.)

The effect of microstructure on the resistance to electromigration of Al–Cu thin film conductors. . 47
A. J. Patrinos and J. A. Schwarz (Syracuse, NY, U.S.A.)

Preparation and Characterization

Composition and texture of thin films grown under 1 bar of fluorine at the surface of GaAs. 65
A. S. Barrière, B. Desbat, J. Grannec, H. Guegan and T. Seguelong (Talence, France) and J. Chazelas (Orsay, France)

LiF films: production and characterization 75
R. M. Montereali, G. Baldacchini, S. Martelli (Rome, Italy) and L. C. Scavarda do Carmo (Rio de Janeiro, Brazil)

Arsenic loss during palladium reaction with bulk and thin film gallium arsenide 85
K. Morishita (Pasadena, CA, U.S.A.), J. M. Molarius (Espoo, Finland), E. Kolawa, M. Dobeli, T. Tombrello and M.-A. Nicolet (Pasadena, CA, U.S.A.)

Laser-induced thermochemical vapor deposition of tungsten films and its applications. 95
X.-B. Lu, J. Zhang and M.-X. Qui (Shanghai, China)

Segregation behavior for Co–Cu multilayers 103
Q.-B. Chen, M. Onellion (Madison, WI, U.S.A.) and A. Wall (Rochester, MN, U.S.A.)

The epitaxial growth of vanadium on Cu{111} substrates 111
H. L. Gaigher and N. G. van der Berg (Pretoria, South Africa)

Langmuir–Blodgett and Related Films

Structural study of Langmuir–Blodgett monolayers and multilayers of amylose-esters with various alkyl chains. 121
M. A. Schoondorp, E. J. Vorenkamp and A. J. Schouten (Groningen, The Netherlands)

Molecular orientation behavior of paraffin thin films made by vapor deposition 137
K. Tanaka, N. Okui and T. Sakai (Tokyo, Japan)

Reversible photodimerization of amphiphilic thymine derivative in Langmuir–Blodgett films. . . . 147
E. Yano and S. Tatsuura (Atsugi, Japan)

Langmuir–Blodgett mono- and multilayers of poly(isocyanide)s with different sidechains. 153
M. N. Teerenstra, E. J. Vorenkamp, A. J. Schouten (Groningen, The Netherlands) and R. J. M. Nolte (Nijmegen, The Netherlands)

Condensed Matter Film Behaviour

Catalytic activity of ion-bombarded silver films 163
E. Grantscharova and D. Dobrev (Sofia, Bulgaria)

Letters

Electrophotographic characteristics of layers of amorphous selenium on substrates with different thicknesses of oxide barrier film L1
N. I. Ibragimov, M. I. Shneidman, V. G. Agaev and Z. M. Abutalybova (Baku, U.S.S.R.)

Quasi-crystalline thin films in Al–Mn and Mn–Bi L5
J. Reyes-Gasga, R. Hernández and M. José-Yacamán (Mexico, Mexico)

Laminated nanometre Ti/TiN coatings deposited by a reactive cathodic arc technique L11
J. Vetter, J. Erben and B. Rother (Karl-Marx-Stadt, F.R.G.)

Origin of d.c. conduction and dielectric relaxation in lightly doped polypyrrole films L15
R. Singh, R. P. Tandon, V. S. Panwar and S. Chandra (New Delhi, India)

Chromium–phosphorus films deposited by the pyrolysis of an organometallic precursor L21
I. M. Watson, J. A. Connor (Canterbury, U.K.) and R. Whyman (Runcorn, U.K.)

Friction and wear of polytetrafluoroethylene on diamond-like carbon film L25
E.-L. Yang, A. Anttila (Helsinki, Finland), R. O. Toivanen (Espoo, Finland) and J.-P. Hirvonen (Helsinki, Finland)

On the suitability of Cu/Mn multilayered films as strain gauges L31
M. A. Angadi and R. Whiting (Trinidad, West Indies)

Issue 2

Electronics and Optics

Compositional dependence of the optical properties and structural peculiarities of amorphous Ge–S–Ga(In) chalcogenides. 171
V. Kh. Kudojarova (Leningrad, U.S.S.R.) and Z. G. Ivanova (Sofia, Bulgaria)

Frequency-dependent conductivity in evaporated amorphous silicon films 179
C. Z. Çil and G. Aktas (Istanbul, Turkey)

Characterization of tantalum silicide contacts on GaAs 193
G. Eftekhari (New Paltz, NY, U.S.A.)

Low temperature behaviour of ion-beam-grown polymer–metal composite thin films. 201
P. Bruschi, A. Nannini and F. Massara (Pisa, Italy)

Forward recoiling spectroscopy analysis of thin film electroluminescent structures 215
R. Lappalainen (Helsinki, Finland) and P. J. Pokela (Espoo, Finland)

Metallurgical and Protective Layers

Surface microhardening in argon-implanted aluminium 223
A. K. Goel, N. D. Sharma, R. K. Mohindra, S. Aggarwal (Kurukshetra, India) and P. K. Ghosh (Roorkee, India)

Buckle formation in vacuum-deposited thin films 229
H. Y. Yu (Washington, DC, U.S.A.), C. Kim and S. C. Sanday (Washington, MD, U.S.A.)

Radiation-assisted interactions between gold and copper across a nickel barrier 235
V. P. Bhattacharyya and P. D. Prabhawalkar (Bombay, India)

Preparation and Characterization

Laser-melted amorphous anodized Al_2O_3 layer: structure and properties 243
G. Shafirstien, M. Bamberger (Haifa, Israel) and G. Revesz (Yavneh, Israel)

The nucleation and growth of Pd–Au alloy particles on NaCl(100) 253
A. Schmidt, M. Spode, H. Heinrich and R. Anton (Hamburg, F.R.G.)

Laser-stimulated growth of the ε-Ti_2N phase in Ti–N films during d.c. reactive magnetron sputter deposition 265
V. Poulek, J. Musil, V. Valvoda and R. Kuzel, Jr., (Prague, Czechoslovakia)

Diamond and non-diamond carbon synthesis in an oxygen–acetylene flame 271
L. M. Hanssen, K. A. Snail, W. A. Carrington, J. E. Butler, S. Kellogg and D. B. Oakes (Washington, DC, U.S.A.)

Preparation of NASICON thin films by dip-coating on Si/SiO_2 wafers and corresponding *C–V* measurements 283
Y. L. Huang, A. Caneiro, M. Attari and P. Fabry (Saint Martin d'Heres, France)

Molecular beam epitaxial growth and characterization of pseudomorphic modulation-doped field effect transistors 295
J. Zhang, N. C. Tien, E. W. Lin, H. H. Wieder, W. H. Ku, C. W. Tu (La Jolla, CA, U.S.A.), D. B. Poker (Oak Ridge, TN, U.S.A.) and S. N. G. Chu (Murray Hill, NJ, U.S.A.)

Hydrogen and lithium intercalation in Cs_xWO_3 305
Q.-M. Zhong and K. Colbow (Burnaby, B.C., Canada)

Reactive sputtering of electrically conducting tin oxide 315
R. P. Howson (Loughborough, U.K.), H. Barankova (Prague, Czechoslovakia) and A. G. Spencer (Loughborough, U.K.)

Langmuir–Blodgett and Related Films

The effect of film-forming conditions for tapCuPc Langmuir–Blodgett films on morphology and properties 323
A. D. Lu, X. M. Pang, Y. J. Li, D. P. Jiang, Y. L. Hua, W. Q. Chen and E. L. Zhou (Changchun, China)

Condensed Matter Film Behaviour

Review of plasma-assisted deposition processes 329
H. Randhawa (Boulder, CO, U.S.A.)

Etch rate behaviour of phosphosilicate glass films chemically vapour deposited in the SiH_4–PH_3–O_2–N_2 system at low temperature 351
C. Pavelescu and C. Cobianu (Bucharest, Romania)

Electrical conductivity of solution-grown poly(2,6-dimethyl-1,4-phenylene oxide) films 361
A. K. Kalkar, S. Kundagol (Bombay, India), S. Chand and S. Chandra (New Delhi, India)

Author Index 369
